^{*} R thread is same as BSPT

4 Color and Packaging option

Code	Color and Package classification	Color Co	Remark		
Code	Color and Fackage classification	Release ring(*)	Fitting body	nemark	
No code	Std.	Black, White	Black		
-C	Clean-room package	Light-blue, White	Light-gray, Black	Optional selection	
W	Light-gray	Light-gray	Light-gray	Optional selection	
W-C	Light-gray + Clean-room pkg.	Light-gray	Light-gray	Optional selection	
-UC	Clean-wash and Clean-room pkg.	Light-blue	Light-gray	Optional selection	

^{*} Release-ring color is white for inch-size products.

^{※.} Imperial sizes - Clean-room Pakage comes with black body. Ask us for the options W, W-C, -UC

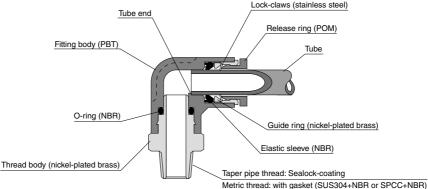

Specifications

Fluid medium	Air / Water (※)
Max. operating pressure	150psi (1.0MPa)
Max. vacuum	-29.5 in. Hg (- 100 kPa)
Operating temp. range	32 ~ 140°F (0 ~ 60 °C) (no freezing)

- Marning-

- * . Make sure to follow the instructions below when the fluid medium is water.
 - 1. Surge pressure must be controlled lower than max. operating pressure.
 - 2. Tap water can be used. Consult with PISCO for using other kind of water.
 - 3. Be sure to place Insert Ring into the tube edge when using water as a fluid medium.

■ Construction (Elbow: PL) |

With the second seco

↑ Detailed Safety Instructions |

Before using PISCO products, be sure to read "Safety Instructions" and "Common Safety Instructions for Products Listed in This Catalog" and "Common Safety Instructions for Fittings"

Warning

1. When the fluid medium is water, do not use Tube Fitting Standard Series unless the operating environment meets all the described specifications in the catalog. Otherwise, it may cause damage to the products, the escape of tubes and a fluid leakage.

Caution

- 1. To adjust the direction of the elbow fitting after fixing PML (Bulkhead Union Elbow) type, turn it in the clock-wise (right) direction.
- Attach a rubber washer to the aluminum nut side when installing PML (Bulkhead Union Elbow) type. The bulkhead parts may be loosened or the rubber washer may deform if attaching it to the hexagonal side.

Caution (Clean-room package, clean-wash package)

1. As for Push-In Fitting, the functional part where tube is inserted may slightly slide due to an internal pressure change and this may generate dusts. Avoid using the fitting in the clean room of ISO class from 1 to 5. Under the vibrating condition, check the amount of dust generated from the fitting and tubes, by using actual facilities.

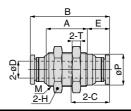

Caution (Clean-wash package)

1. Tube insertion into the push-in fitting with clean-wash spec. is tigher than that of standard spec. due to its oil-free specification. Make sure to insert tube up to tube end.

Unified thread bulkhead

unit: inch

Model	Tube O.D.	М	В	Е	Α	φP	C	Hex.	Т	Orifice (9mm)	Weight (g)

Common caution in this page -

^{※1.} ① in Model code / Replaced with "W" for Light-gray color, "-C" for Clean-room package, "W-C" for Light-gray color and Clean-room package, "-UC" for Clean-wash and Clean-room package

^{* 2.} Orifice bore is the smallest passage converted in terms of the diameter.

How to insert and disconnect

1. How to insert and disconnect tubes

① Tube insertion

Insert a tube into Push-in fitting up to the tube end. Lock-claws bite the tube and fix it automatically, then the elastic sleeve seals around the tube.

Refer to "6. Instructions for Tube Insertion" under "Common Safety Instructions for Products Listed in This Catalog".

2 Tube disconnection

The tube is disconnected by pushing release-ring to release Lock-claws. Make sure to stop air supply before the tube disconnection.

2. How to tighten thread

① Tightening thread

There are two ways to tighten thread. Use a spanner or an impact wrench for a hexagonal-column. A hex key is for an inner hexagonal socket. Inner hexagonal type can save spaces.

Refer to "Table 2: Tightening torque / Sealock color / Gasket materials" under "8. Instructions for Installing a fitting" in "Common Safety Instructions for Products Listed in This Catalog".

See "Find Part # " for Inch NPT and Metric Push-In fittings

▲ Common Safety Instructions for Fittings

Before selecting or using PISCO products, read the following instructions. Read the detailed instructions for individual series.

↑ Warning

1. Use PISCO products within the range of the specifications for each series. Consult with PISCO for use outside the specifications.

1. A panel mounting nut of Bulkhead Union (PM), Bulkhead Union P (PMP), and Bulkhead Union Elbow (PML) should be tightened within the specified tightening torque range.

Bulkhead nut tightening torqu

Carias	Tube size	Tightening torque					
Series	Tube size	Bulkhead Union (PM)	Bulkhead Union P (PMP), Bulkhead Union Elbow (PML)				
	4	12.0 ~ 14.0N·m	0.4∼0.6N·m				
	6	18.0 ~ 21.0N·m	0.9 ~ 1.1N·m				
Tube Fitting	8	18.0 ~ 21.0N·m	1.1 ~ 1.3N·m				
Tube Filling	10	19.0 ~ 21.0N·m	2.3 ~ 2.7N·m				
	12	19.0 ~ 21.0N·m	2.7 ~ 3.3N·m				
	16	42.0 ~ 54.0N·m	_				
	1.8	0.8 ~ 1.0N·m					
	2	0.8 ∼ 1.0N·m					
Tube Fitting Mini	3	2.5 ~ 3.5N·m	_				
	4	5.0~7.0N·m					
	6	12.0~14.0N·m					

- 2. If an object between the bulkhead nut and fitting body is deformable or has oil on its surface, the nut may loosen after tightening.
- 3. PISCO pneumatic fittings are designed for use with tube inserted. Air supply without tube insertion such as air flushing may cause an elastic sleeve to fly out of the fitting.

Identification of fittings
